**Subject:** MPA (Marine Protected Area)

Hi,

I'm a sport diver and fisherman who helps protect the environment. In fact, that's my area of business expertise as well. I feel that recreational divers and fisherman have very little impact on the areas listed in the MPA, and allowing these folks to continue to fish on a limited basis actually helps protection. We are the people who spread the word about poachers, keep the beaches clean, etc.

Irrisponsible actions, included poor watershed management, large hydro, overfishing by commercial vessels, development and pollution are the main causes for the decline in fishing. Please let us continue to enjoy these areas!

Thanks,

Peter Brumis
